College days aren't just nostalgic—they're the actual pillars that quietly hold up our entire career skyscraper. The classroom is the birthplace of ideas, but guidance turns those ideas into impactful careers.

Ever wondered why our "decision-making skills" look suspiciously similar to what we learned back in college? simply because applying what those formative years wired into us.

On 9th December 2025, ISAZI Academy (**ISAZI**) had the privilege of visiting Anand Pharmacy College (**ANAND PHARMACY COLLEGE**)—my second home, where I graduated exactly 20 years ago (yes, 2005 feels like yesterday until I look in the mirror).

The session was packed with: 📌 Real-time regulatory case studies 📌 How to safe guard and empower regulatory roles with AI 📌 A live walkthrough of actual eCTD publishing (yes, the skill nobody tells you is gold until you enter the industry) 📌 Career motivation sprinkled with a dose of reality And trust me...

I genuinely enjoy these raw, energetic faculties, student interactions far more than the typical meetings.
